Torrance Firms Earn Contracts
Two Torrance firms have been awarded government contracts, according to Alvin P. Meyers, regional director of the U.S. Small Business Administration for Southern California, Arizona and Southern Nevada.
Jones Chemicals Inc. received a contract of \$3,968 for chlorine gas and Warren Southwest, Inc., a contract of \$8,000 for paving asphalt.

ACCEPTS AWARD . . . Herald Publisher Glenn W. Pfeil accepts first place spot news photo award from Governor Brown during the annual California Newspaper Publishers convention in San Diego last weekend. A photo by Herald photographer Darrell Maddox last June of an at-the-scene cave-in rescue was judged the best among California non-daily newspapers in 1963. Publisher Pfeil was re-elected to serve his third term as a member of the board of directors of CNPA at the conclusion of the convention.

Bank of America to Name Award Winners

Students at El Camino College who participated in the 1964 Bank of America Junior College Business Awards with students throughout the state will soon know the outcome of the competition.
Faculty committees in 73 junior colleges all over the state, including 38 schools in the Southern California Junior College Assn., are now judging the records of candidates.
In all, 146 students will each receive a check for \$200, a total of almost \$30,000 in cash awards.
Two winners will be selected from each school, one majoring in business administration or banking, the other in secretarial or clerical studies. Participants will be judged on scholarship, business personality, and additional school activities or outside employment.

Dr. Stuart E. Marsee of El Camino College is serving on the committee of college presidents assisting in administration of the program in Southern California. Dr. Benjamin K. Swartz, president of East Los Angeles College is chairman of the committee.
Harry M. Bardt, executive vice president of Bank of America, will present the checks March 20 at a banquet in the Beverly Hilton Hotel.

Harbor Veteran Takes New Post

Ray Johnson, one of the "49'ers," who opened Harbor College in that year, has accepted a position as dean of instruction at Los Angeles Pierce College.
Johnson was coordinator of instruction at Harbor from 1956 to 1959 when he became assistant dean of instruction. In 1961 he served as college curriculum coordinator in the administrative offices of the board of education, returning to Harbor in 1962 to substitute for Dr. John Grasham, dean of instruction. For the past semester Johnson has been acting dean of student personnel.

Water water everywhere

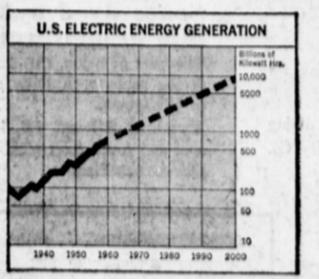

Today you could actually drink a glass of pure, fresh water produced from the salty Pacific Ocean—at the experimental sea water distillation plant operated by Southern California Edison in connection with its steam-electric generating station near Oxnard. This is just one of the research projects vigorously conducted by Edison and other investor-owned electric companies. But the mainstream of research is devoted to the exploration of new techniques, methods and ideas for the generation, transmission and distribution of electricity. This research is part of the never-ending development of more and more low-cost electric power—and of new ways to use electricity to make your family's life safer, more pleasant, and more rewarding in the bright new all-electric future. For late news on the greatest "treasure hunt" of modern times, please read right.

Answers to key questions about the investor-owned electric utility industry and the all-electric future

How will the research by the electric industry affect me and my family?
This research is resulting in dozens of "little miracles" that will make your life safer, healthier, more rewarding and more interesting. Low-cost electricity will be there at the touch of your finger (and you won't even have to flip a switch). And new wonders in the all-electric future will help you heat, light, clean, and decorate your home. You'll eat delicious meals, prepared almost as quickly as you can make the selection. You'll scour your pots, keep an eye on the children and even mow your lawn with the help of new electronic wonders. Clean, flameless, low-cost electricity will do most everything but handle your thinking in the all-electric future.
And electricity is one of today's biggest bargains. The chart below shows the national cost picture for residential electricity over the past fifty years.

What else is new?
Almost everything is new in the electric utility business. New principles of power production are being pushed ahead. One travels ionized gas through a magnetic field—and produces electricity without the need for conventional turbine generators. Another transforms chemical energy directly into electric power; other methods convert heat directly into electric energy. Electricity is efficient and low in cost today. And scores of new developments are on the horizon in the all-electric future!

Here's the picture of power production up to the year 2,000. With the aid of research and the world's finest engineers and scientists, Edison and America's other investor-owned electric companies stand ready and able to meet in full the future power needs of all Americans.
For more details, send for your copy of "The Investor-Owned Electric Utility Industry." Write: The Advertising Department, Southern California Edison Company, P.O. Box 351, Los Angeles 53, Calif.

Every man desires to live long, but no man desires to be old.—Jonathan Swift.
